

TriQuint's Commitment to the Environment: Product Compliance

At TriQuint Semiconductor, environmental responsibility is integral to our business. We focus on conserving resources, preventing pollution, and reducing impact to the environment. An important aspect of environmental responsibility is reducing the volume of hazardous material in circulation worldwide. TriQuint is committed to meeting or exceeding all global product environmental regulations that affect its products.

Currently, all TriQuint commercial products are:

- RoHS Compliant
- Beryllium-free
- SVHC-free
- PFOS-free

TriQuint prides itself in being a good environmental steward by creating products that are more Earth-Friendly. We constantly monitor new regulations around the world, and respond to mandates and suggestions accordingly. Contact TriQuint at rohs_info@tqs.com if you have any questions regarding compliance of any TriQuint products.

2008.....

Antimony Trioxide eliminated from new designs.

2009.....

All new designs starting at the concept stage effective January 2009 will be Halogen-free. Existing designs converted to Halogen-free on a case-by-case basis.

Cobalt dichloride (REACH SVHC) was eliminated from Humidity Indicating Cards in February 2009. TriQuint will continue to monitor new SVHC substances.

All new designs starting at the concept stage effective April 2009 will be Antimony-free. Existing designs converted to Antimony-free on a case-by-case basis.
